Installation Guide

Camera:

Mount the camera in a suitable place, ensuring correct viewing angles behind your vehicle. Secure wiring through the boot of your vehicle.

Screen:

You can stick the screen on the dashboard using the supplied double side tape, make sure the dashboard is clean and grease free. Run the screen cable snugly through to the vehicle boot.

Wiring Guide:

After joining all connectors, double check to ensure connections are correct.

While vehicle ignition is switched off, join the system power input red wire to reverse light positive wire, and black wire to reverse light negative wire using the supplied wire joining clips.
